

## **Our Vision for the Brazos River**

In the future...

- ❖ The natural ecosystems of the Brazos River are conserved and appreciated by the community at large.
- ❖ The relationship of the Fort Bend community to the Brazos River is enhanced by safe public access.
- ❖ Land trails, paddle trails and parks are connected in a distinguished Brazos River greenway system.

We will do this by:

- ❖ Assuring that improvements for public use respect wildlife habitat and private lands.
- ❖ Facilitating public-private partnerships for maximizing shared economic, social and environmental benefits.
- ❖ Promoting river-oriented facilities and activities that encourage community and regional involvement.
